Dear friends and sponsors,

The Caminul Felix Ministry in Romania is a fine place of peace and work. Peace since we have found our homes, and work since there is a whole lot of toiling towards confidence and a full life. But you see it come so powerfully. Marcel and the Felix parents are God sent. Their commitment carries the Ministry.

Caminul Felix in Romania is going to celebrate 20 years by May 18, 19 and 20. The Leadership board has suggested a Villa Felix to be built. It gives supported living for the young adolescents that need closeness to their Felix families and still have moved out to an independent living.

That is quite a beautiful concept, identified by the parents that know what is important in the young one's lives. Lots of people will be coming. How wonderful is this!

Latest reports

Felix Family Thailand

Felix Family Village in Thailand had its annual board meeting in March. It was a good one. Lisa Egerbo and pastors K and Mana, along with the Thai parents lead the fine Ministry wonderfully. In just weeks the seventh home will be opened. The family is waiting for it - we all rejoice. I am proud to see the concept of family being implemented also in Thailand.

Needs in Thailand are now *the three remaining homes*, and *the Gathering house* - a facility for seminars of parents, gathering for all children and evenings of celebration.

Felix Family Zimbabwe

Africa is a diverse place and to the senses very rich continent. Even though parts of Africa are developing fast, there are still many millions of abandoned children, and it is a problem not likely solved in a short term future. In some places, a whole parent generation is absent, having either passed away from disease, war, hunger, or forced by extreme poverty to work away from their families.

At best, the children left live with a grandparent. Often they grow up in child-headed families. They are vulnerable, live hand-to-mouth, and struggle to break the poverty cycle.
