OCTOBER | 2013

Felix Family in Africa

We are horrified over the events in Nairobi. Our people in Kenya are all safe, but the loss of lives, especially that of the children, is incomprehensible. Children need love.

The main reasons for children being abandoned are poverty and war, often closely linked to AIDS. Whole parent generations have gone missing, and the children are either left to their own devices or are cared for by relatives, usually the older generations. Schooling is a challenge, which leaves the children without education to fend for themselves in the fields or the streets of large urban areas. They do not know where the next meal is coming from, and it develops into a

vicious cycle, where kids get used and abused, sometimes ending up in slavery.

One child at a time we can reverse the trend. Felix is starting now to reach further than before. We have set up a new office in East Africa through which we are establishing new Felix villages. We have partners in Uganda, Tanzania and Kenya, and we have ourselves started a feeding program in Kenya through which we feed poor and abandoned children.

We ask you to remember our need for your support when we feed these children, and when we take them in. We are building homes and establishing families. You can give to our feeding program, or support a child. We are setting ourselves up so that we can allocate supporters to specific children, and as soon as we are ready, within a couple of months, we will make the introduction.

Thank you for supporting us in making this possible!

- Jesper Hornberg

Felix Family Village Thailand

Slowly but surely, the work continues and we are pleased to take note of the reports coming from the Village. It is a great joy to see the pictures sent from Surat Thani and how the Multi Purpose Building becomes much more complete. In so many ways, this building will be a joy and bring help to children and adults. The feeling that there really is a Family Village coming up gives joy and thankfulness to everyone who has been involved and contributed to this house. Once again, we want to be bold and ask for your help to financially support the project. We are a long way but as shown in the chart there remains about 1/3 before everything is funded. The money means that 30,000 Euros more

is needed before all is paid and clear. Maybe you want to participate and complete this project? We sincerely thank to who want to participate. Your gift is very important whether it is big or a little less.

Felix Family travel in Norway and Sweden

Meanwhile, 19 October to 10 November, one couple from Felix Village will travel together with Lennart Larsson and Lars Hornberg, particularly in Norway. A few meetings at the end of the trip will take place in Sweden. Previous trips had the goal of presenting and communicating the work. They tell us about the miracles happening in the lives of children through the new family that they had. They tell us about how God is calling young couple in Thailand to join as parents of abandoned children. There is strong evidence to see the children and hear their parents.

Felix Family Villages Romania

We greet you all again in this beginning of autumn, hoping that you have enjoyed a beautiful summer and, of course, a time of relaxation.

The families of Caminul Felix have been busy with different activities: work around the house, relaxation, vacation or tours in or outside the country.

Whenever we think about you, we are overwhelmed by thoughts of gratitude and thankfulness for all the support that you offer this ministry. Through your support, many children can enjoy the blessing of having a family and experience the joy of this reality every day.

We also realize that, as parents, it is very important to be present in the lives of these children, knowing that before they came here, they had to face negligence from their parents, or even absence from their lives. We are truly blessed through the support you are giving. This way, we have the possibility to offer our children as much as possible of our time and energy

every day, trying to model them and teach them true values. We want to offer our children a family in which they will find safety and stability. We get involved together in many activities, being aware that the amount of time spent with our children is an important ingredient in their formation.

Thank you for being part of our lives and in our children's lives. We wish you many blessings and a wonderful autumn!

- Simona Puscas
